

## "Engaging Kids with the Environment - Youth Environmental Leadership Program"

To whom it may concern,

We are a group of youth from high schools within the CRD known as Youth Environmental Leadership Program (YELP), whose goals are to inspire others to inclusively build a connected, educated, and sustainable community.

By visiting your elementary or middle school classroom with a personalized interactive presentation, with film clips, educational games, prizes, or even a guided nature walk, we aim to show your students a positive view, and ways they can be connected to their environment, and build a sustainable future!

We are looking for your interest in allowing us older youth to engage and educate the younger learners, through a presentation or program built to fit your interests and schedule. Please provide your input through the survey linked below, which is designed to determine what you may be interested in! To get in touch about the presentations please contact Chris Fretwell, Youth Engagement Coordinator, by email at [chris@sierraclub.bc.ca](mailto:chris@sierraclub.bc.ca)

Thanks for your time and consideration!

Sincerely,

The YELP Team
